

Guidelines on Changing Rooms and showering facilities

These guidelines apply to the arrangements to be made for adults, and children, using changing facilities.

CPPCC will follow the ECB best practice principles as follows:

- Adults must not change, or shower, at the same time using the same facility as children
- If adults and children need to share a changing facility, they must do so at different times. *
- Mixed gender teams must have access to separate male and female changing rooms
- Due to the risks of inappropriate photography or filming, mobile phones must not be used in changing rooms

If children are uncomfortable changing or showering at the club, no pressure should be placed on them to do so.

* Junior players who play in an adult game may use a joint changing room provided their parent has given written consent.
